

RecipeMe App

Erika Bates '21

Advisor: Madalene Spezialetti, Department of Computer Science
Trinity College, Hartford CT

Introduction

RecipeMe is a cross-platform mobile application that allows users to enter their household inventory and then find recipes based on what they have in store.

Motivations

High pace lifestyle
Food waste
Promotion of dietary health
Decrease meal planning stress

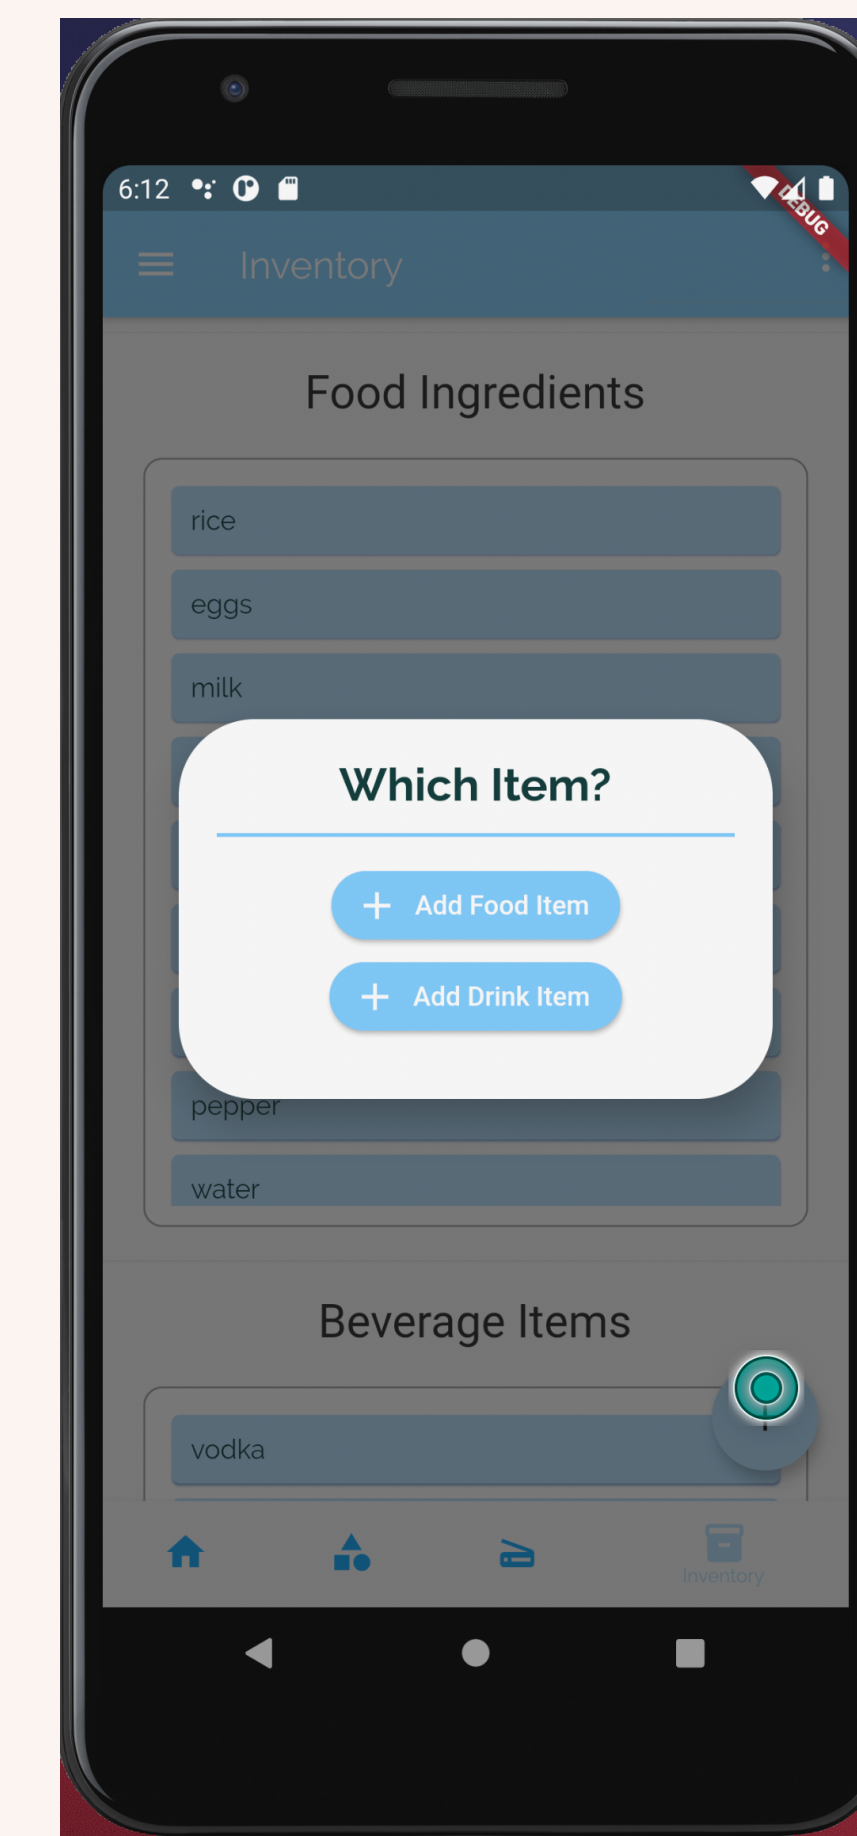

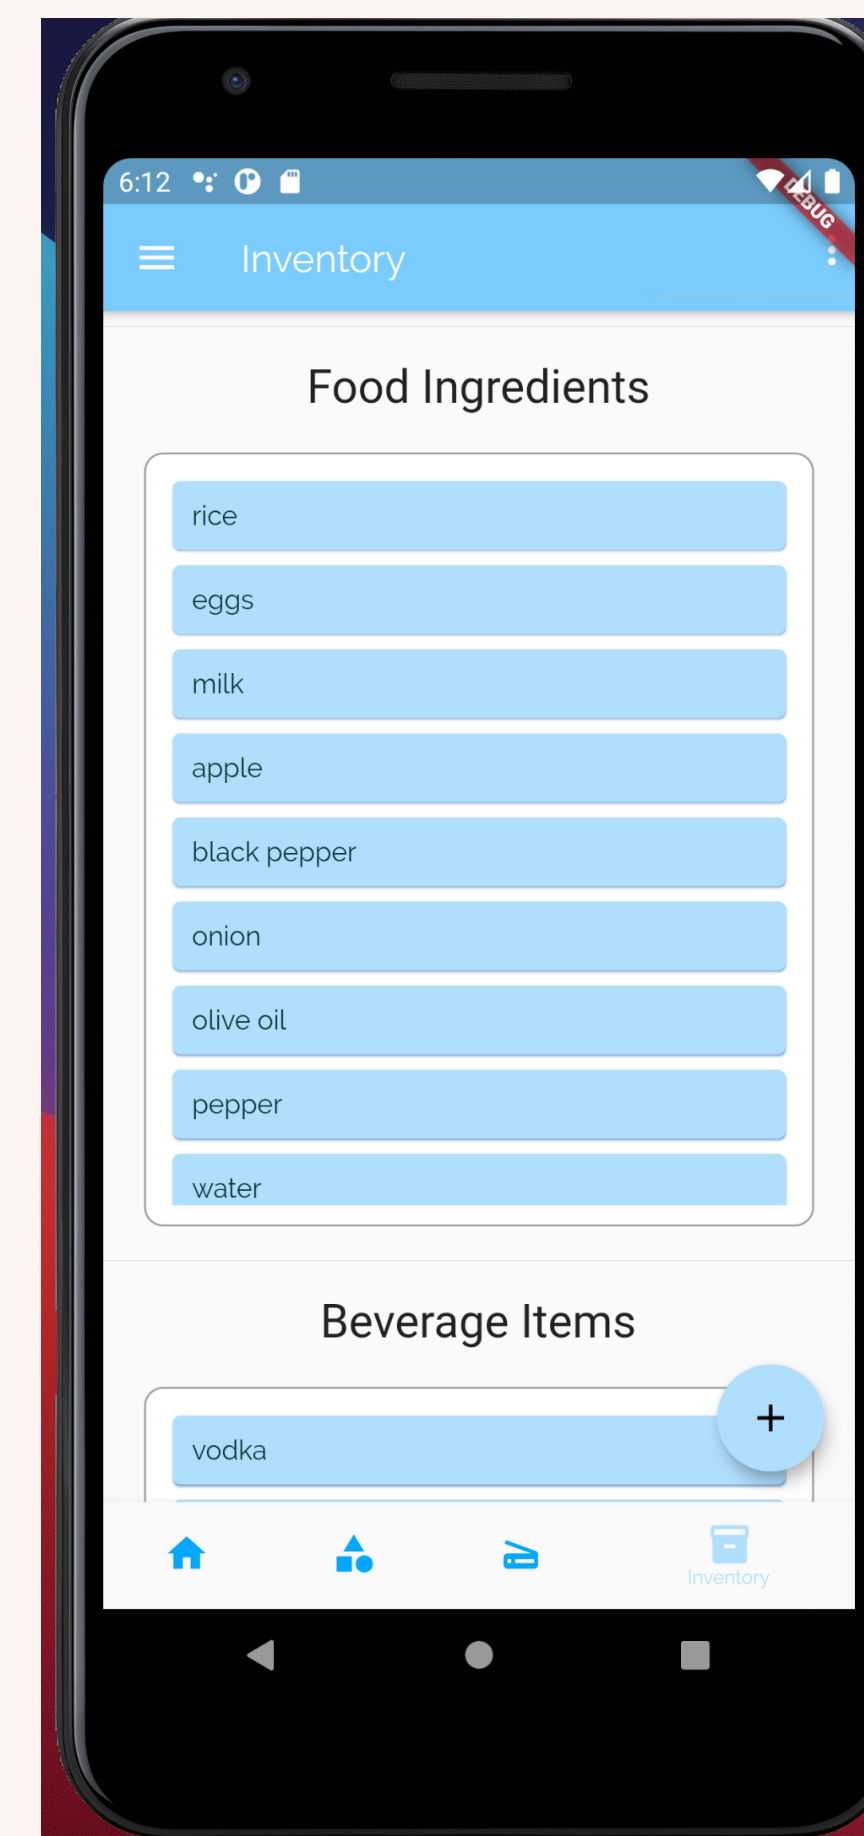

Softwares

Inventory Storage

Add ingredients when purchased

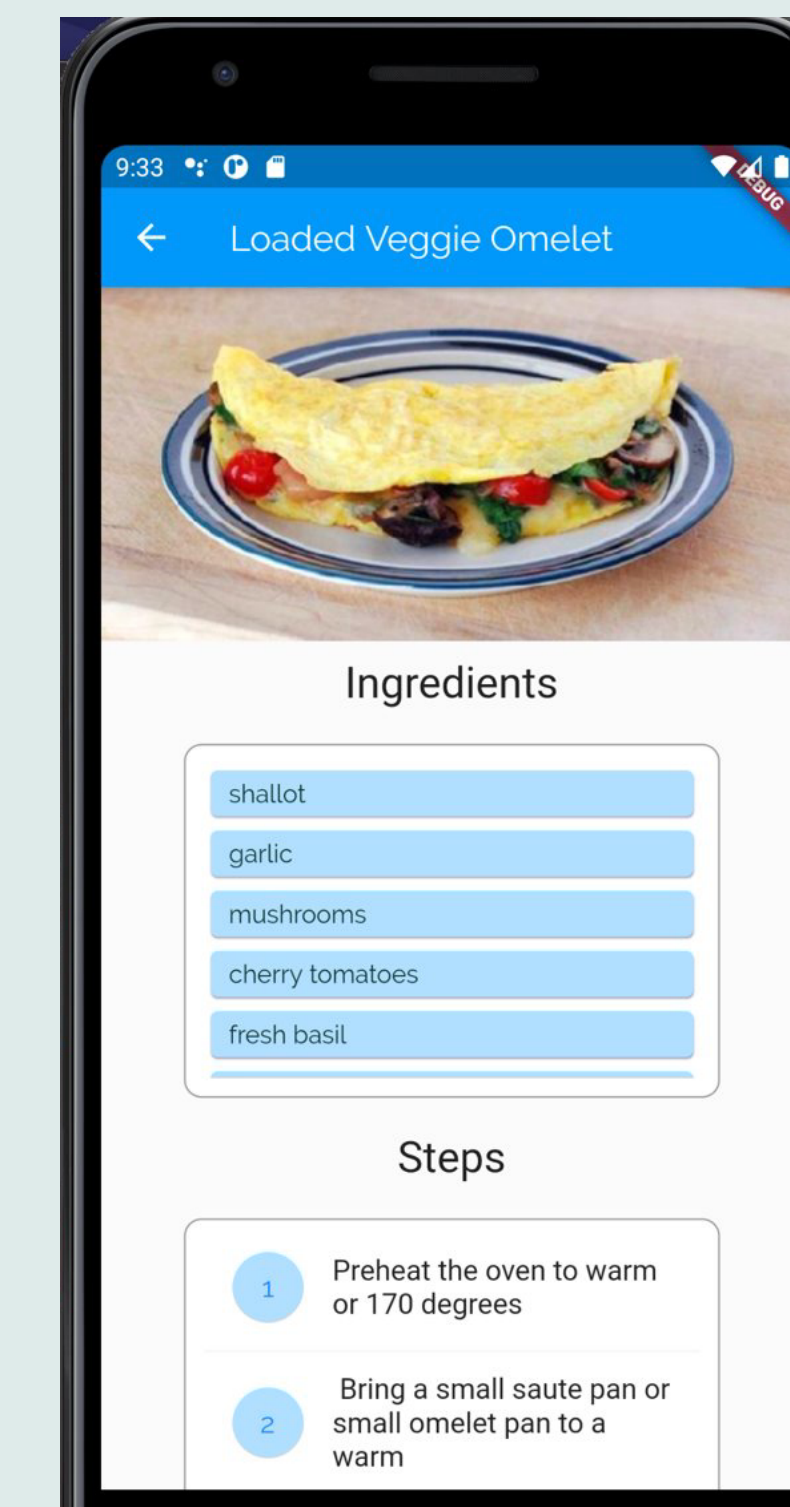

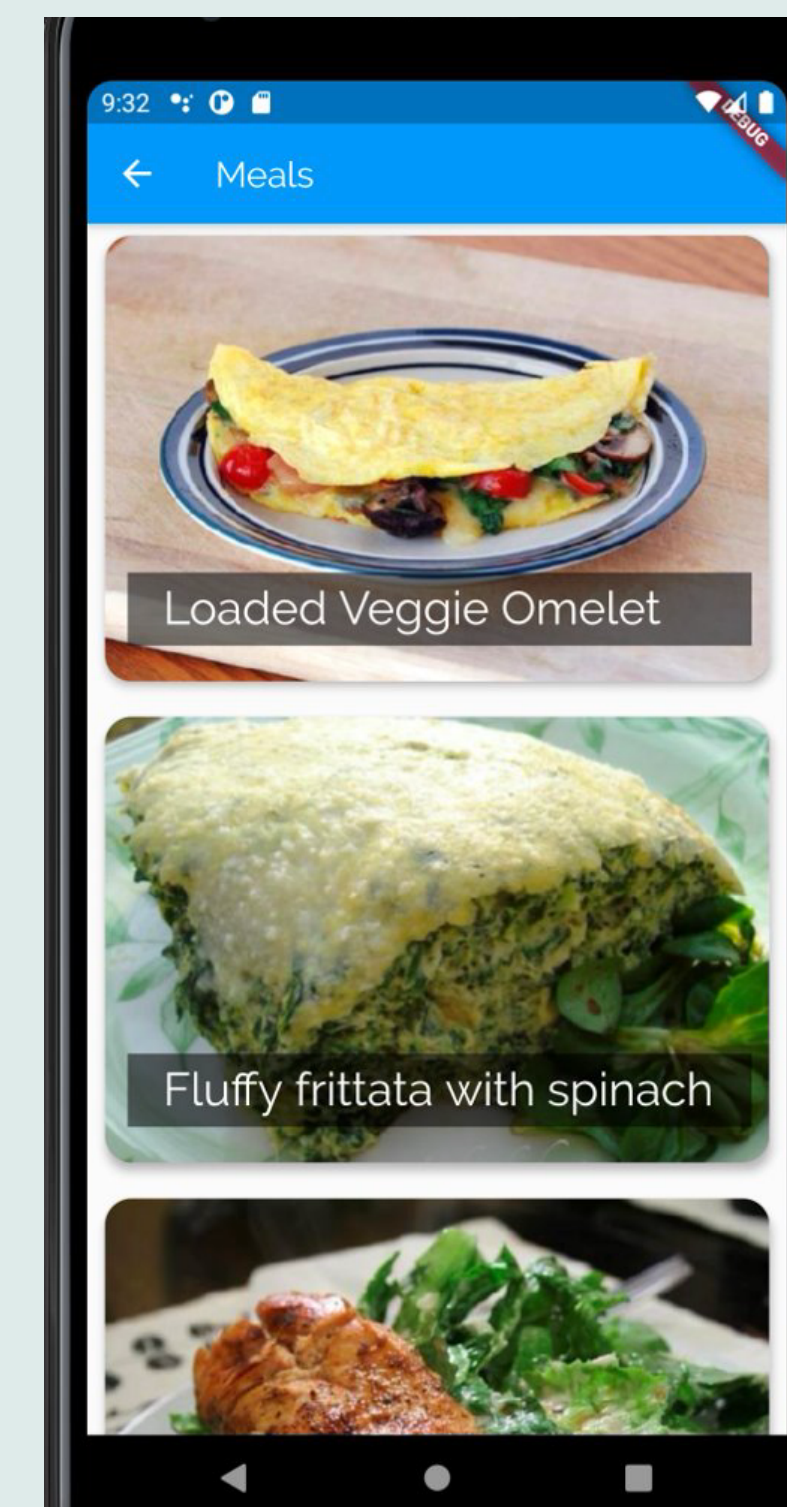

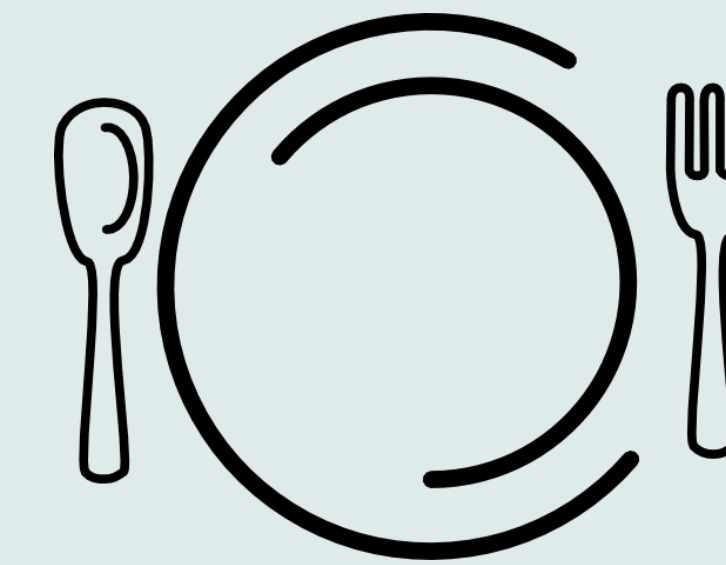

Remove when used by swiping

Recipe Generation

Recipes for foods or drinks generated based on which ingredients you have

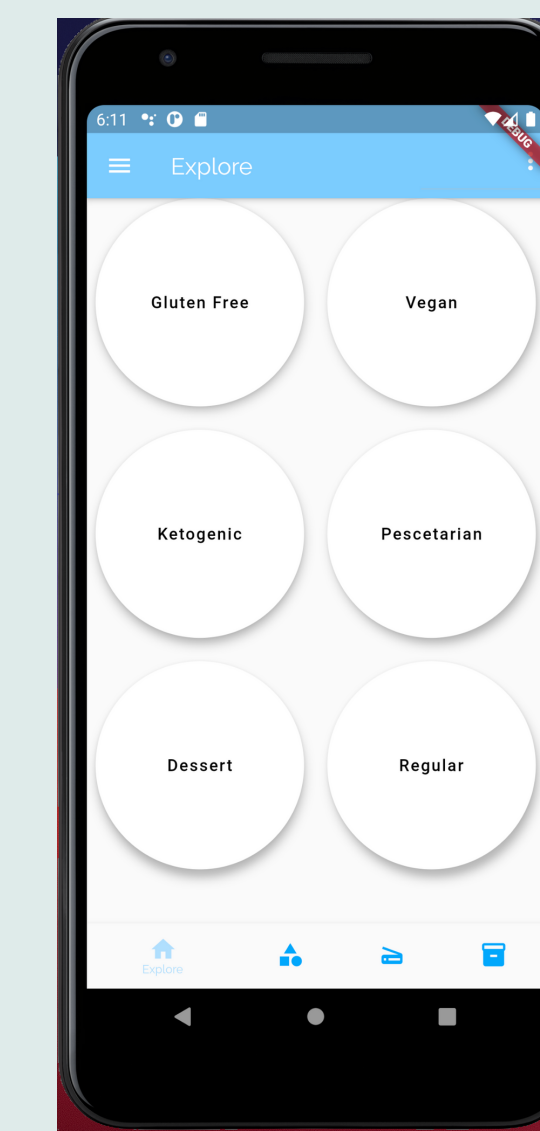

Generates both drinks (cocktails) and foods

Exploration

View recipes from numerous different diets and categories!

Swipe through and view one that interests you!

Drinks

Primarily focuses on alcoholic beverages

Depends on your ingredients, so if you only have non-alcoholic beverages it will generate non-alcoholic drinks
